

# CyClean<sup>®</sup>

Advanced formulation multipurpose solution containing Biopol™.

## Features

**Revolutionary contact lens cleaning system.**

**Innovative, anti-bacterial contact lens case.**

**Contains Biopol™.**

**Advanced formulation multipurpose solution.**

**Suitable for use with all lenses including silicone hydrogel lenses.**

## Benefits

Provides practitioners with the opportunity to prescribe a genuine no rub solution.

The CyClean<sup>®</sup> case means less handling, leading to better hygiene and less risk of damage to the lens.

The CyClean<sup>®</sup> case ensures that the entire lens surface is cleaned every time.

The antimicrobial efficacy of the case helps to prevent the proliferation of biofilm and provides extra safety to the patient.

Biopol enhances disinfection efficacy, leading to better kill times against ocular pathogens including Acanthamoeba.

Unique formulation ensures outstandingly comfortable lens wear, increasing patient satisfaction leading to a lower level of drop outs.

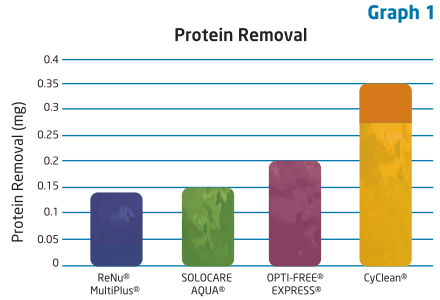

Greater patient compatibility.

# Clinical Studies

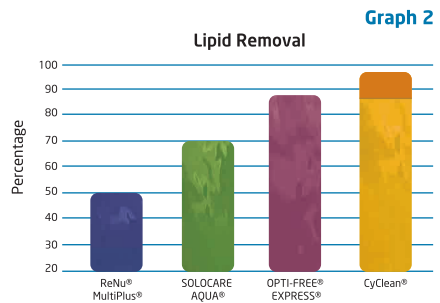

## Better Cleaning

Graph 1 illustrates that CyClean® removes significantly more protein than its nearest competitors.

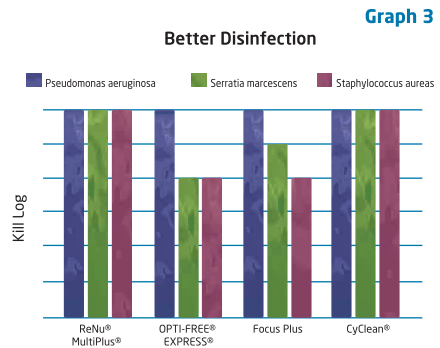

CyClean® is extremely effective in removing lipids from the lens, as illustrated in Graph 2.

 The performance of CyClean® is increased by up to a further 30% when using the twisting action of the soaking case.

## Better Disinfection

Following an inoculation of 1,000,000 (6 log) of each organism, a complete kill was achieved for each organism in the manufacturers' recommended soak time (6 log is complete kill).

## Better Comfort

The synergistic combination of active ingredients within Biopol™ enhances lens comfort by lubricating and wetting the lens surface.
